

Families

Penny platypus says, "Most lizards live by themselves but my friend Northern Velvet Gecko likes to be with his family. You might find them all snuggled together under a piece of bark from a tree."

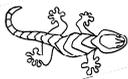

What do you like doing with your family?

God's book the Bible says, "God places (us) in families."

Psalm 68:6

Colour the Northern Velvet Gecko's stripes different colours. Can you count his family?

I can say, "Thank you Father God for giving us families. Please help us to care for each other. Thank you for the things we can do and the fun we can have together."
